Electronic Technician Maintenance II – Fort Hood, TX

PULAU Corporation is seeking an Electronic Technician Maintenance II in support of the Warfighter Focus contract under the Raytheon subcontract. This position is on the AGES/TESS Aviation Contact Team. This is an hourly, non-exempt position at the hourly rate of \$20.62. This position is located at Fort Hood, TX and no relocation assistance is available. This position requires extensive travel both in the Continental United States (CONUS) as well as to installations in Germany and Korea (OCONUS).

Electronics Technician II performs duties and assignments under the direct supervision of the AGES / TESS Aviation Contact Team (ACT) Electronics Technician III. Providing the technical expertise in all Army Aviation maintenance, safety practices and procedures as required for the integration of the rotary-wing aircraft and the AGES / TESS system. The ACT mirrors Army Aviation policies and procedures concerning maintenance and operations when providing AGES / TESS support.

Job Duties will include:

- Performs and enforces “By the Book” maintenance activities on the OH-58D, AH-64A and AH-64D aircraft designated for AGESII or TESS operations. Identify, turn-in and exchange of faulty Line Replaceable Units (LRU's) to designated maintenance facility for repair. Prepares equipment for shipment to and from AGESII or TESS activity sights. Performs inventory of AGES / TESS kits and components during turn-in and issue.
- Depending on unit's assigned aircraft that are scheduled for AGES / TESS training exercises, Electronics Technician II may be required to provide assistance as necessary to unit personnel in installation, MOCs, and de-installations of “passive” AGES II and SMODIM/DCI instrumentation equipment. Supported airframes would include UH-60A/L/Q, CH-47D, UH-1H/V, OH-58A/C

“Proven Excellence Through Quality Performance”

- Will be required to perform AGES system diagnostics and troubleshooting to determine faulty equipment. Repairs will in accordance with established maintenance and safety practices and procedures that are within their scope and level of maintenance authorization.
- Accountable for all assigned tools, test and support equipment.
- Identify, turn-in and exchange of faulty Line Replaceable Units (LRU's) to designated maintenance facility for repair. Prepares equipment for shipment to and from AGESII or TESS activity sights. Performs inventory of AGES / TESS kits and components during turn-in and issue.

Required Qualifications and Experience:

- Candidates will be required to work in compliance with all OSHA and company safety policies and procedures.
- Must be able to obtain a valid drivers license, maintain post and company driving privileges.
- Must have a valid Passport.
- Must be a US citizen and able to obtain a Secret Security Clearance.
- Must be able to life a maximum of 50 pounds and wear appropriate personal protective equipment.
- Have the ability to perform duties in extreme weather conditions and must be willing to work any shift, weekends, holidays, and overtime.
- Minimum high school diploma, GED.
- Prefer minimum, three years army aviation experience as a maintenance or armament technician, with flight line, Aviation Intermediate Maintenance (AVIM) and field experience.
- Knowledgeable and proficient in all aspects of the applicable aircraft's systems and cockpit procedures, concerning switchology, weapons systems, operations, targeting and designating systems, and associated mission equipment. This will be performed in accordance with the associated technical, maintenance, operator's manuals and checklists.
- Will be required to successfully complete the AGES / TESS Aviation Contact Team training program before being considered qualified and certified to perform AGES II support duties. This training included classroom instruction and exams, technical manual familiarization exams, and extensive hands on practical training in garrison and field environments.

Long Haul Network Specialist – 29 Palms, CA

PULAU Corporation is seeking candidates as Long Haul Network Specialists for the Marine Corps Tactics & Operations Group at 29 Palms, CA, as part of a potential award of a U.S. Government contract. This is an hourly, non-exempt position. This position is located at 29 Palms, CA and no relocation assistance will be available.

Job Duties will include:

- Plan, install, operate and maintain MCTOG long haul (SWAN/JNN/LMST) and TACSAT (PSC-5, PRC 148, 117) networks that shall be primarily data focused.
 - Services riding these networks shall include ABCS, USMC C2 Microsoft Server 2003/2008 servers to include Domain Controllers, DNS Servers, DHCP servers, Exchange Servers, SharePoint Servers, Print servers, Backup servers, WSUS Servers, Antivirus Servers, and Virtual Machines using VM-Ware, ESX server, and Microsoft Virtual Server to act as application server platforms.
- Setup, configure, and maintain the Cisco router and switches in a Core, Distribution, and Access Layer design; this includes updating and backing up configurations as well as researching better ways to secure the network.
- Setup encryptions on the hardware and port security via MAC address port reservation.

“Proven Excellence Through Quality Performance”

- Plan, install, operate, and maintain network redundancy solutions.
- Coordinate with MCTOG command to implement network outages in support of network maintenance.
- Install all new software versions on ground control station application servers.
- Ensure that the rigorous application of information security/information assurance policies, principles and practices are in the delivery enterprise, data and network services.
- Receive, process and execute mitigation for Information Assurance Vulnerability Alerts to include network elements, encryption devices, operating system, application server software, hardware updates, and patches.
- Install, operate, upgrade and back up all network management software used to monitor network capacity and performance.
- Identify and develop network requirements in support of unit training and develop logical network diagrams from requirements.
- Validate and update physical network diagrams as required.
- Configure logical and specific IP addresses for all network elements, according to the network plan.
- Answer trouble calls for all Long Haul and TACSAT network data services and provides feedback to the users as well as the command.
- Maintain software library for command and training units.

Civilian Education:

- Bachelor’s degree in Computer Information Systems or Electrical engineering desired.

Certifications required (from DODINST 8570).

- Comp TIA Network + and Comp TIA Security+, Microsoft Certified Systems Engineer (MCSE - Win 2003/2008 Enterprise Server or better), Technical Specialist (MCTS - MS Exchange server 2003/07), Cisco Certified Network Administrator.

Certifications desired.

- Microsoft SQL 2007, Microsoft SharePoint 2007.

Military Operational Experience:

Required:

- Applicants shall have a minimum of three (3) years experience in long haul/TACSAT communications and networking within a military communications unit.
- Applicants shall have knowledge in Information Assurance (IA) to identify recommendations for facility safeguards to include Crypto equipment interconnectivity i.e. KG-175s.
- Shall have knowledge in digital Marine Corps Tactics & Operations Group (MCTOG) 122 communication networks (classified [SIPR] and unclassified [NIPR]) employed in support of military operations.

Desired:

- Previous military service.
- Knowledge in tactical Wide Area Networks. Knowledge of integrating systems and applications across the SIPR and NIPR networks in order to support data paths to include the integration of multiple protocol QOS applications to improve network efficiencies.

Other:

- Moving and repositioning computer systems, servers, and other office equipment weighing no more than 50 pounds per person (e.g. two-man lift 100lbs).

“Proven Excellence Through Quality Performance”

- Eligible for at least a secret security clearance.

Senior Advisor – 29 Palms, CA

PULAU Corporation is seeking candidates as a Senior Advisor for the Marine Corps Tactics & Operations Group at 29 Palms, CA, as part of a potential award of a U.S. Government contract. This is an hourly, non-exempt position. This position is located at 29 Palms, CA and no relocation assistance will be available.

Job Duties will include:

- Provide support services for training activities, development of supporting training documentation, and contractor personnel conversant in training support technology.
- Ability to evaluate emergent training support technologies.
- Majority of provided support shall be rendered via a remote work environment. Support categories include:
 - Assist with developing Regimental and Battalion CP SOPs and the recurring maintenance of those documents as an exportable GCE document
 - Assist in the drafting and development of a MCO that defines the MCTOG Charter, and mission analysis and charter development of GCE TECOE responsibilities
