SUBCONTRACT TYPE: FFP		
LOCATION OF PERFORMANCE: Fort Irwin, CA; Fort Hood, TX; Camp Casey, Korea; Fort Stewart, GA; Fort Bragg, NC; and Fort Campbell, KY.		
PERIOD OF PERFORMANCE: 1 April 2008 – 30 April 2017 (with all options exercised)		
<b>DESCRIPTION OF WORK PERFORMED</b>		
<p>PULAU is providing live training support at a number of Army sites both CONUS and OCONUS, including TESS/MILES maintenance, live fire shoot house maintenance, live fire range support including battlefield effects and target lifter operation and maintenance, communications equipment maintenance, generator and electrical distribution maintenance, facility/ HVAC maintenance, and vehicle maintenance for military and commercial vehicles. A total of 140 employees are deployed to six different sites: NTC/Fort Irwin, Fort Bragg, Fort Hood, Fort Campbell, and Fort Stewart and Camp Casey, Korea.</p>		
<b>RELEVANCE TO PROPOSED FUNCTIONAL AREAS</b>		
3.15	Measurement Facilities, Range, and Instrumentation Support	PULAU is providing live fire range support at the NTC, including target lifter removal/repair, warehousing, and maintenance; and battlefield effects support, including movement and control of pyrotechnics for live and laser-based (simulated) exercises.
3.16	Logistics Support	PULAU technicians are providing life cycle support for various equipment, including target lifters and associated targetry, radios and related communication equipment, tracked and wheeled vehicles, generators and electrical distribution systems.
3.17	Supply and Provisioning Support	PULAU provides supply and provisioning support at the NTC and other locations for the installation, repair, de-installation, and warehousing of MILES equipment on ground and rotary winged vehicles, including battery charging and disposal. PULAU operates warehouses at the NTC to store and repair targetry and target lifters, including the electronics and batteries associated with the target lifters. We also operate warehouses at Fort Hood, TX and Camp Casey, Korea in support of training exercises using MILES equipment.
3.18	Training Support	PULAU employees train customers on how to install and use MILES equipment at the Fort Irwin, CA; Fort Hood, TX; and Camp Casey, Korea.
3.19	In-Service Engineering, Fleet Introduction, Installation, & Checkout Support	PULAU provides installation, checkout and maintenance support at the NTC for target lifters and targetry, radios, communication links, radio towers including antennas, tracked and wheeled vehicles, generators and electrical distribution systems
